

```
1 #include <stdio.h>
2 #include <unistd.h>
3
4 int main()
5 {
6     printf("Hello World!\n");
7     if( fork() != 0 )
8         printf("I am the parent process.\n");
9     else {
10         printf("A child is listing the directory contents...\n");
11         execl("/bin/ls", "ls", "-al", NULL);
12     }
13     return 0;
14 }
```
