

```
1  LOAD    [i], r0    ; load the value of 'i' into
2                      ;    a register from memory
3  ADD     r0, 1       ; increment the value
4                      ;    in the register
5  STORE   r0, [i]     ; write the updated value
6                      ;    back to memory
```
