```c
1   #include <stdio.h>
2   #include <unistd.h>
3
4   int main()
5   {
6     printf("Hello World!\n");
7     if(fork() != 0 )
8       printf("I am the parent process.\n");
9     else {
10      printf("A child is listing the directory contents...\n");
11      execl("/bin/ls", "ls", "-al", NULL);
12    }
13    return 0;
14  }
```
